

HELMET TORCH WITH POSITION LOCATION BEACON

Robust, reliable and ultralight, the L5POWER is a powerful torch which incorporates a flashing red LED in the tail, to facilitate locating team members in the darkest environments.

ATEX certified intrinsic safety for use in hazardous areas and confined spaces, where there is the potential for gas and dust build up.

- Certification: ATEX intrinsic safety (ATEX is a European certification)
- CE Marked
- Ingress protection IP67
- White power LED with up to 30 hour burn time
- Flashing red LED in tail to assist in locating team members in low visibility
- Operating modes: first click - torch turns on at full power with red LED positioning beacon on | second click - torch on at full power with red beacon turned off | third click - torch turns off
- Light output 150lm
- Beam distance 96m
- Powered by 4 x AAA Alkaline batteries
- Photoluminescent bezel increases visibility
- Durable, impact resistant, anti-static thermoplastic resin torch body
- Soft touch on/off button for easy operation with a gloved hand
- Can be mounted on Pacific Helmets using the A107118 Helmet Clip
- Made in Spain
