

(ii)

PAC FOAM SUPER-CONCENTRATE

Pac Foam is a 2 litre foam super-concentrate. It has been formulated to make 20 litres of Class A wildland firefighting foam concentrate, comparable to what is traditionally supplied in 20 litre pails.

Specially developed to create a well formed foam blanket with excellent bubble structure (i), Pac Foam clings to solid combustibles, and acts as thermal barrier.

Pac Foam has been designed to be biodegradable making it the environmentally friendly, space saving solution for back burns and mop ups.

A. SUPER CONCENTRATE. Pac Foam concentrate makes 20 litres of Class A foam when added to 18 litres of water as per the product instructions (ii).

B. 2 LITRE SIZE: A weight and space saving solution and alternative to bulky 20 Litre pre-mixed pails.
