

Adjusting instructions for the One Touch Eye Protector™

Turn to adjust resting
position of eye protector.

One Touch Eye Protector™

ONE TOUCH™ to deploy

ONE TOUCH™ to stow

- **Simple activation:** only a gentle upward thumb push is needed to lower the eye protector. **Do not pull down on the eye protector.**
- **Easy stow:** gently push the eye protector up until it "clicks" into the locked position.
- **Ease of use in any situation:** operation is unaffected even when wearing the thickest of gloves.
- **Rigidity and protection:** 2mm Polycarbonate construction offers structural rigidity and protection against impact by high speed particles.

- **Security:** stows easily and safely in place when not in use.
- **Smooth deployment:** specialised design enables smooth and gradual deployment of the eye protector.
- **Adjustable resting position:** the eye protector's height can be adjusted to fit the wearer's facial features.
- **Certified to EN166 & ANSI Z87.1** (equivalent to AS/NZS 1337)
