

14TH NOVEMBER 2019

Dear Valued Customer,

Effective immediately, YDS, the manufacturer of our range of firefighting footwear has made a change to the colour of the reflective material used in their structural firefighting boots.

The yellow reflective material in the Hades and Poseidon Footwear will be replaced by silver reflective material.

YDS have advised that this modification effects the colour only and there is no material or specification change creating any impact on compliance to the standard AS/NZS4821: 2014.

Pac Fire still have stock with the yellow reflective material which will of course be run down in due course.
