

NSW RFS RANK DECAL APPLICATION INSTRUCTIONS

RANKRFS CAD INSTR++ KIT CONTENTS

1x 25mm Green Band Set (3 stickers)

2x Rank Wording green lettering "CADETS INSTRUCTOR"

RANK / POSITION: CADET INSTRUCTOR

BEFORE GETTING STARTED

- Remove the Face Shield from the helmet.
- Use a soft cloth to clean the helmet shell from dirt and debris.

25MM BAND SET

THE 25MM BAND SET IS AVAILABLE IN DIFFERENT COLOURS DEPENDING ON YOUR RANK / POSITION. FOR THE PURPOSES OF THESE INSTRUCTIONS, GREEN BAND SET IS PICTURED.

BS1. The 25mm Band set is made up of 3 stickers, 2 short and 1 long.

BS2. Remove sticker "A" (as indicated in BS1).

BS3. Apply to the right side of the helmet, between the earmuff clip and the large black plug.

BS4. The sticker should be positioned in the middle, between the clip and plug where the helmet shell meets the brim.

BS5. Run your thumb over the sticker to press out bubbles and creases.

BS6. Remove sticker "B" (as indicated in BS1).

BS7. Apply to the left side of the helmet, between the earmuff clip and the large black plug.

BS8. The sticker should be positioned in the middle, between the clip and plug where the helmet shell meets the brim.

BS9. Run your thumb over the sticker to press out bubbles and creases.

BS10. Remove both rubber accessory retention straps by gripping the strap and pulling the plug out of the hole, place them to the side.

BS11. Remove sticker "C" (as indicated in BS1).

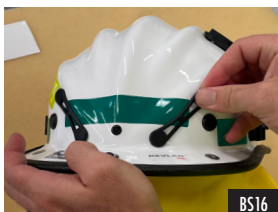

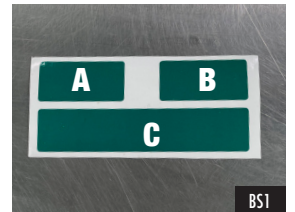

BS12. Fold the sticker in the middle with the adhesive facing outward and pinch to crease in the center.

BS13. Position the sticker just above the rivet in the rear of the helmet. The crease in the sticker should be centered in the middle of the center ridge.

BS14. Let the sticker go so it settles on the helmet.

BS15. From the center of the sticker out to the edge, use your thumb to fix to the helmet while pushing out air bubbles and creases.

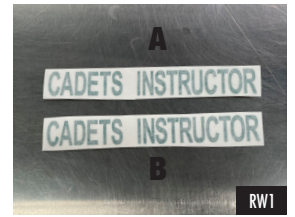

BS16. Replace the rubber accessory retention straps by pushing the plugs into the holes.

RANK WORDING

RANK WORDING IS AVAILABLE IN DIFFERENT COLOURS AND CONFIGURATIONS DEPENDING ON YOUR RANK / POSITION. FOR THE PURPOSES OF THESE INSTRUCTIONS, 'CADETS INSTRUCTOR' IS PICTURED.

- RW1. In your rank decal kit, you would have received two stickers - both the same size.
- RW2. We're going to apply them to the helmet in the valley on either side of the second ridge from the center.
- RW3. Starting on the right side of the helmet you will find the entire rank word sticker will not fit in the space provided because of the Easi On Off Torch Base - so we need to split the word.
- RW4. Looking at sticker "A" only, there are two defined words in your rank wording. Using a pair of scissors, cut the sticker to separate the two words.
- RW5. Trim excess paper so the letters are close to the edges of the sticker.
- RW6. Align the start of the second word with the right side of the Easi On Off Torch Base, in this example we're using the word 'INSTRUCTOR'.
- RW7. Run your thumb over the letters a few times to ensure they're adhered to the face paper and the sticker is ready for application.
- RW8. Slowly and carefully remove the backing paper from the letters - the adhesive side will now be exposed.
- RW9. Apply the sticker, aligned with the Easi On Off Torch Base.
- RW10. Run your thumb over the letters several times with the face paper still attached to make sure they are firmly adhered and to press out bubbles and creases.
- RW11. Remove the face paper.
- RW12. Align the end of the first word with the left side of the Easi On Off Torch Base, in this example we're using the word 'CADETS'.
- RW13. Run your thumb over the letters with the face paper still attached.
- RW14. Slowly and carefully remove the backing paper from the letters.
- RW15. Apply the sticker, aligned with the Easi On Off Torch Base.
- RW16. Run your thumb over the letters to ensure they're adhered to the face paper and the sticker is ready for application.
- RW17. Remove the face paper.
- RW18. Looking at the front of the helmet - align sticker "B" with where your rank word sticker finished on the other side of the helmet.
- RW19. Run your thumb over the letters on the second sticker.
- RW20. Slowly and carefully remove the backing paper from the letters.
- RW21. Apply the sticker, aligned with your first rank wording sticker.
- RW22. Run your thumb over the letters several times with the face paper still attached to make sure they are firmly adhered and to press out bubbles and creases.
- RW23. Remove the face paper.
