

ADALIT L-90 POWER (PROTO)

USER MANUAL & features

ON/OFF switch button

- First click
The main LED switches on at maximum intensity.
- Second click
The main LED and the two auxiliary LEDs on the side of the optic switch on. The light beam is more gentle and uniform. Due to the special design of the LedEngine Power Optic, the light gets a greater opening angle that works a **step lighting system**.
- Third click
The torch switches off.
- Keep hold 4" – STROBE FUNCTION
The main central LED gets on in strobe mode. To return to the previous position, push again On | Off button.
- Keep hold 5" - SAVE BATTERY MODE
The light output decrease and the run time is extended 5 times.
